### Editorial

My greetings to all respected principals and teachers and students and newly admitted students of pharmacy! Now, the colleges have already opened and buzzing activities like admission process, chalking out programmes for whole year ahead, laying down of time table, recruitment of new staff, etc. must be going on.

The atmosphere on the campus is full of fresh air, ready to embrace the students once again and to welcome the new entrants!

Generally, there is a sort of lethargy seen in the students during the first month because they used up the vacation time in relaxed mood. Coming back to the campus, their mood changes slowly and they gear up to learn course of lectures and practicals for the coming year. Apart from the annual day functions and gathering, this period is really being enjoyed by them in gossiping business.

At this moment, a word of caution to them: please do not involve individually or in groups in that nonsense thing called 'ragging', it is really a curse which can spoil the career of one poor student and his family. On the contrary with great maturity be their big brothers and take them in the stride to become great pharmacy students like you! As we practiced in our student days, you should approach the new colleagues and invite them for a tea party, introduce to each other and assure them full co-operation.

This is the beginning of professional camaraderie which lays foundation of a bond lasting for whole life and thereby makes the profession stronger!!

Once again my best wishes to all respected principals and teachers, students and new students.

## महाराष्ट्र राज्यातील सर्व फार्मासिस्ट विचारवंतांना आवाहन

आपणास एव्हाना माहित झाले आहे की महाराष्ट्र फार्मासिस्ट असोशिएशन ही आपली संघटना आता बाळसे धरू लागली आहे. संघटनेच्या कार्यास गती येण्यासाठी आपण सर्व फार्मासिस्ट सहकाऱ्यांना एकत्र येवून संघटित रित्या काम करण्याची नितांत गरज आहे. आपल्या व्यवसायास अपेक्षित उंचीवर नेण्यासाठी आपण एकत्रितपणे कटिबद्ध आहोत. तसेच प्रत्येक फार्मासिस्ट च्या आयुष्यामध्ये त्यास आर्थिक स्थैर्य व योग्य तो मान सन्मान मिळवण्यासाठी वचनबद्ध आहोत. आपण सर्वांनीच तन, मन व धन त्यासाठी द्यावे म्हणून वारंवार आवाहन करित आहोत.

तथापी संघटनेचे कार्य अधिक प्रभावीपणे व जोमाने चालावे म्हणून संघटनेस हवे आहे एक नैतिक व वैचारिक बळ, जे मिळू शकेल आम्हाला आमच्यामधील अनुभवी व जेष्ठ सहकाऱ्यांकडून. यासाठी संघटना अशा जेष्ठ व अनुभवी सहकाऱ्यांचे एक बहु आयामी असे सल्लागार मंडळ तयार करू इच्छित आहे. या सल्लागार मंडळामध्ये येवून कार्य करण्यासाठी जेवढे जास्त सहकारी पुढे येतील तेवढा जास्त आनंद संघटनेस होईल हे निश्चित. त्यांच्या सल्ल्याने व पाठींब्याने संघटनेची पुढील वाटचाल सुकर होईल यात शंका नाही.

तेव्हा महाराष्ट्र राज्यातील सर्व अनुभवी व जेष्ठ फार्मासिस्ट सहकाऱ्यांना विनंती करण्यात येते की त्यांनी लवकरात लवकर त्यांच्या स्वच्छेने संघटनेस आपली संमती कळवावी. यासाठी संघटना त्यांची सदैव ऋणी राहिल.

तरी आपला बहुमुल्य वेळ काढून सहकार्य करावे व फार्मसी व्यवसायास आपण सर्वांनी निश्चित केलेल्या ध्येयाप्रत नेण्यास खारीचा वाटा उचलावा ही नम्र विनंती.

## **Vision2020- Current challenges & future prospects of community pharmacist**

(A write up on second prize winning speech delivered in IPA organized National Elocution Completion- IPC Dec. 2006 Mumbai) Abhishek Sharma\* UG Student Institute of Pharmacy, Pt. Ravishankar Shukla University Raipur-492010

The Pharmaceutical Magazine Institute of Pharmacy, Pt. Ravishankar Shukla University, Raipur (Dec 2006)

A community pharmacist is the most pious part of this great pharma profession and that is a proven fact, but friends I do not think that I have got this grand stage of IPC just to glorify my profession. IPA is not running this competition just to give away some prizes to the students. This is a serious effort to frame the future of our profession by taking inputs from those budding pharmacists who will be there serving in 2020. I have got a mission and a responsibility of conveying the thoughts and the vision of the youth to the authorities. So let us start with current challenges. The first challenge in front of the community pharmacist is that he is not equipped in terms of educational standards. Degrees and diploma are completed with an industry-centered approach and these students register as community pharmacist having little knowledge of clinical pharmacy. The second basic challenge is lack of people awareness, when people do not know that what a pharmacist is what pharmacy is all about, how they will understand the role of a community pharmacist. I remember that when I was preparing for this NEC finals, I used to go to a research center, a very own research center of mine, which was actually a medical store near my house. There I encountered a challenge, which was created by a community pharmacist himself, which was "lack of ethics". I saw bribes and schemes promoting the sale of substandard drugs. I saw a total lack of strong political will to enforce laws and regulation." Schedule H" drugs were dispensed without any prescription. Alprazolam and Sildenafil citrate were like OTC products and more on that, if you have done any mistake by taking Sildenafil citrate, you can easily kill that 'unwanted fetus' because 'Mefipriston' was available in just 250 bugs. I saw a world where every thing was seen with a view of profit. I also remember that one day a person came to that store and asked for a typical Rifampicin, Pyrazinamide and ethambutol combination but the strange thing was that he was asking just

for a single tablet. I genuinely told that person that" sir! I think you should buy more of these because Tuberculosis requires at least four to six month of regular therapy but instead of thanking me for saving his life that person got really angry. He fired me by saying that who gave you the authority to call me a patient of T.B. You sure are an agent of those multinational companies who are promoting the sale of these expensive drugs?

I was speechless because suddenly I was aware of the challenges that a community pharmacist does not possess any authority, he does not possess any dignified social status, he is not backed with legislations and that was my last day in that store when I told that person that proper treatment and medication is available free of cost in GOVT. Hospitals. 30000 crore-rupee pharma industry spending billions for research and development and at the grass root level we are not equipping our community pharmacists. We are allowing grocers to kill people. So friends with these pathetic facts and example I think that I have created a 'zone of anger' in the minds of all you people sitting here. Please preserve that zone of anger as we move towards the future prospects of community pharmacist. So when I visualize for 2020 first of all I see that the power is in our numbers. Today we are about 560000 pharma specialists and scientist and amongst which 75 %are involved in retail community and hospital sectors and if this ratio continues I see thousands of community pharmacists becoming integral part of the national healthcare programs like Polio vaccination, AIDS awareness chronic disease management etc. I also see community pharmacists penetrating NGO(s) like WHO and serving in towns and villages, serving at the primary level of healthcare. I see community pharmacists selecting therapy, monitoring response, reducing deaths and errors. I also visualize that how a community pharmacist of 2020 will be used as a tool or resource to manage a national epidemic or disaster. IF

he can tell a patient of 'chickengunia' that "sir you can't take aspirin", in the same manner why he can't be used in a chemical or biological attack. In 2020 40% of the medicines will be from the biotech sector. These sophisticated medicines will require special counseling monitoring and follow-up by a community pharmacist. In 2020 the emphasis will be on individualization of therapy. In future community pharmacist will be able to read patients biological clock or Chronopharmacological condition that is pharmacokinetics and pharmacodynamics with an additional dimension of time. We all know that sedatives work better if given in night similarly in 2020 community pharmacist will be able to design a specific treatment regimen for a patient of hypertension according to his peak hours of stress. This information will be combined with the genetic individuality and clinical history of that particular patient by a common virtual database. This is my vision 2020 for the community pharmacist but when I discussed my vision with one of my senior faculty member he said that son your vision is quite perfect theoretically but it cannot be achieved because it is not practical. I was shocked and after rigorous thinking for several hours I finally came to a conclusion that my vision was lacking in three aspects- Ethics Moral leadership and Prescription X. In that context let us talk about mantras and shloks. Yes! An obvious question arises that instead of 2020 why am I talking about mantras and shloks? The reason is that the first shlok of 16th chapter of the Geeta is an excellent example of what qualities a community pharmacist should possess. Fearlessness, purity inside in a state of eagerness to acquire knowledge, will to donate, self-control, organizing an event of public interest, self-study and finally the easiness of mind body and voice. If you don't possess these qualities than you are not fit for this pious profession. Additionally the greatest visionary of India honorable president Mr. APJ Abdul Kalam has his own vision 2020 about pharmaceutical sector. So with ethics of the Geeta moral leadership of people like Mr. President and Prescription X, which is the zone of anger that we have preserved today, we are able to do anything and when I see in the eyes of the young pharmacist having that zone of anger, having enthusiasm and the spirit I can say this

with confidence that this vision 2020 will not just be a vision it will be a reality.

Dear Pharmacist Colleagues this article has been forwarded by Shri. Madhav M. Patil. This article is an eye opener for all of us and gives us the insight and inspiration to advance the profession of community pharmacist in its true form. We appreciate and acknowledge the spirit of the writer student for his mature and straight forward approach in bringing the harsh and naked reality of the profession to the fore. Let us be awakened!

**Take that risk!**  
(Inspiring words of Janet Rand)

To laugh is to risk appearing the fool.  
To weep is to risk appearing sentimental.  
To reach out for another is to risk involvement.  
To expose feelings is to risk exposing your true self.  
To place ideas and dreams before a crowd is to risk being called naïve.  
To love is to risk not being loved in return.  
To live is to risk dying.  
To hope is to risk despair.  
To try is to risk failure.  
But risks must be taken, because the greatest hazard in life is to risk nothing.  
The person who risks nothing, does nothing, has nothing, is nothing, and becomes nothing.  
They may avoid suffering and sorrow, but they cannot learn, feel, change, grow, love, live.  
Chained by their certitude, they are slaves, they have forfeited their freedom.  
Only a person who risks, is truly free.

With Best Compliment from
